

Model 734A DC Power Supply with Battery Back-Up Options Guide

Model 734A DC Power Supply with Battery Back-Up

Provides an uninterruptible source of 54 Vdc, nominal, at 2 A. Input power 120 V, 60 Hz, 2 A. Can be configured for wall or rack mounting. Features two DC power output connectors. Requires mounting kit to be purchased separately. Specialized mounting kits and accessories available. CUL LISTED.

Mounting Kits and Accessories

20700 Wall Mounting Kit

Consists of two 16100 wall mounting brackets and one 20710 fastener kit. Allows one Model 734A to be mounted onto a wall surface.

20703 Flush Mount 19-inch Rack Mounting Kit

Consists of one 16095 bracket set (one left and one right bracket) and one 20713 fastener kit. Allows one Model 734A to be mounted in two vertical spaces (3.5 inches) of a standard 19-inch EIA®-style rack. Brackets designed so that the Model 734A's front panel is essentially flush with rack rails. Kit does not include screws for securing unit to rack rails.

20704 Center Mount 19-inch Rack Mounting Kit

Consists of one 16096 bracket set (one left and one right bracket) and one 20713 fastener kit. Allows one Model 734A to be mounted in two vertical spaces (3.5 inches) of a standard 19-inch EIA-style rack. Brackets designed so that center of Model 734A is essentially in-line with rack rails. Kit does not include screws for securing unit to rack rails.

20705 Center Mount 23-inch Rack Mounting Kit

Consists of one 16097 bracket set (one left and one right bracket) and one 20713 fastener kit. Allows one Model 734A to be mounted in two vertical spaces (3.5 inches) of a standard 23-inch EIA-style rack. Brackets designed so that center of Model 734A is essentially in-line with rack rails. Kit does not include screws for securing unit to rack rails.

VINA-Compatible Mounting Kits and DC Interconnecting Cables

20701 Single-Unit Wall Mounting Kit

Consists of two 16094 wall mounting brackets, one 20719 15-inch DC interconnecting cable, and one 20711 fastener kit. Allows one Model 734A and one VINA Integrator™-style unit to be wall mounted and powered.

20702 Two-Unit Wall Mounting Kit

Consists of two 16098 wall mounting brackets, two 20719 15-inch DC interconnecting cables, and one 20712 fastener kit. Allows one Model 734A and two VINA Integrator-style units to be wall mounted and powered.

20719 15-inch DC Interconnecting Cable

Allows connection of Model 734A's DC output to VINA Integrator-style unit. End one has 6-position Molex Mini-Fit, Jr. connector compatible with Model 734A. End two has a 3-position socket compatible with Integrator-style DC power input connector. Overall length 15 inches (0.4 meters).

20722 6-foot DC Interconnecting Cable

Allows connection of Model 734A to VINA Integrator-style unit. End one has 6-position Molex Mini-Fit, Jr. connector compatible with Model 734A. End two has a 3-position socket compatible with Integrator-style DC power input connector. Overall length 6 feet (1.9 meters).
